

Employer Edge Online Contribution Reporting

24/7 ACCESS TO EMPLOYER REPORTING

Employer Edge™, the secure online Portal that allows employers to upload and submit contribution reports and make payments.

Zenith American
SOLUTIONS®

Zenith American Solutions is the largest Taft-Hartley third-party administrator in the United States and operates numerous offices nationwide, each one focused on serving clients and participants locally through an unrivaled depth of resources and wealth of professional expertise. Through our many years of providing services to Taft-Hartley multiemployer funds we know and understand thoroughly that each Trust Fund is unique. Understanding the complexity of these plans, our systems are flexible to respond to diverse needs. In response to the complications surrounding data protection, our resources are industry-leading.

Zenith American Solutions offers our proprietary Employer Edge™ to allow contributing employers to enter and track remittance information. Employer Edge™ is designed to provide a list of current active employees to the employer.

Employer Edge™ allows the employer to enter contributions by member, selecting the appropriate skill level for each employee as required. The system calculates the total contribution amount due, by Fund, using the contribution rates specific to the skill levels being report.

Employer Edge™ allows the employer to upload a file to the system, prefilling the employee entry screen automatically using the data from the uploaded file. New employees can be added as part of either the file upload process or through the Employer Edge™ interface.

Employer Edge™ allows the employer to pay contribution due amount via EFT processing or submission of a check. There is no additional cost for this online employer-reporting tool.

Mobile-Ready

Employers can access the site 24/7/365 online using a computer, tablet or smartphone.
